Welcome to the April 2009 Alignment Supplies, Inc. newsletter. We are committed to bringing the maintenance and reliability world the most affordable and easy-to-use laser alignment and measurement solutions available today. As maintenance budgets shrink, laser alignment can provide the best first line defense against machine failure. Our on-going development is devoted to improving performance and decreasing cost to the end-user.

Please visit our website to learn about all of our [products!](#)

[Alignment Training](#)

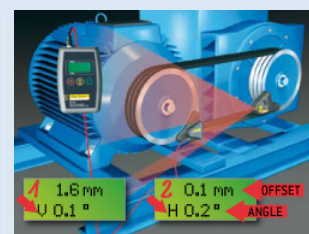

Alignment Supplies, Inc. not only provides world-class alignment tools, we also provide training for shaft alignment and geometric laser measurement.

Contact us for more information about about our new Level 1 and Level 2 shaft alignment courses.

Be sure to ask about training on-site at your facility!

[Digital Sheave & Pulley Alignment](#)

With the new Easy-Laser® D160 belt & pulley laser alignment tool, you can monitor every move you make on the hand-held display.

With Easy-Laser® you eliminate the "guess work"; the D160 will display the angular and offset misalignment values allowing you to align to a specified tolerance.
